

OLIVE OIL EAR SPRAY

SOFTENS & REMOVES EAR WAX

Please keep and read this leaflet carefully because it contains important information for you.
Ask your pharmacist if you need any more information or advice.

How do they Work? What are they for?

- Olive Oil Ear Spray are used to soften and help remove hardened wax from the ear canal.
- Ear wax is an oily substance produced to protect the eardrum. The amount of wax produced varies from person to person.
- Excessive, hardened ear wax is quite common. It causes problems when it builds up and blocks the ear canal. The first symptom is usually a feeling of discomfort and fullness in the ear. This can become painful and cause dizziness and some loss of hearing if left untreated.
- The ear spray act physically to gently soften ear wax. Normally this is enough to encourage the ear wax to dislodge from the ear canal and fall out naturally (e.g. at night when you are laying down). If the drops alone are insufficient, their softening action makes it easier for a doctor or nurse to remove the ear wax using techniques such as ear syringing (irrigation).
- The ear spray are suitable for use by adults, the elderly and children. A doctor should be consulted before use in children under the age of 5 years to confirm that a build-up of ear wax is present.

Composition

Extra Virgin Olive Oil 100.0%

Before you use the Ear Spray

- Do not use Olive Oil Ear Spray
- If you are allergic (hypersensitive) Olive oil.
- If you have history of ear problems, unless you are using it under the close supervision of your doctor, nurse or pharmacist.
- If you are also putting anything else in the ear (such as other ear spray or a hearing aid).
- If you have had your ear syringed in the last 2 to 3 days.
- If your ear drum is (or has been) damaged.
- If you suffer from dizziness.
- If there is anything else wrong with your ear—such as pain, swelling, discharge, infection or tinnitus (ringing sounds in the ear).
- If you have tried to remove the ear wax using fingernails, cotton buds or other implements. (This is because you might have damaged the delicate inner lining of the ear, leading to swelling or infection.) This could make it painful to use the ear spray
- If the ear spray get into the eyes:
- Take care to avoid the ear spray getting in your eyes.
- If this happens, rinse the eye immediately with water for 10 to 15 minutes, holding the eyelids apart and avoiding the rinse liquid in the other eyes.
- Tell your doctor, nurse or pharmacist if irritation persists.
- Using other medical products and hearing aids:
- It is important not to use Olive Oil Ear Spray while you are putting anything else in the ear (such as other ear spray, ear medicines or a hearing aid).
- Olive Oil Ear Spray are not known to affect, or to be affected by, any other kinds of medicines that you may be using.
- If you use more of the ear drops than you should
- Do not worry if you use too much. Simply wipe away any surplus running from the ear with a tissue.

Instructions for use

Adult, elderly & children

- Adult, elderly & children Pull the upper ear or Pinna upwards and backwards.
- Holding the bottle in an upright position with the nozzle placed in the ear canal depress the actuator fully 1 or 2 times.
